

## **Mattishall Neighbourhood Plan**

### **Open Spaces Assessment**

#### **1. Approach**

Planning for Green Spaces is seen by Mattishall Parish Council as a tool that can achieve economic, social and environmental benefits such as helping in the provision and protection of pitches and sports facilities, footpaths and important routes, natural corridors for wildlife, local amenity and flexible space for communal recreation. Open spaces within Mattishall also form part of the character and setting of the village and may form part of an approach to mitigate floor risk.

As such, green spaces together with the existing built environment contribute to the quality of Mattishall. The designation of Local Green Spaces directly relates to the Neighbourhood Plan's **vision**:

**Mattishall will continue to thrive and, through sympathetic and sustainable development, will meet the needs of a modern community whilst preserving and enhancing its village character and its connection to the surrounding rural landscape.**

Local Green Spaces support the following **AIMS** of the Neighbourhood Plan:

- **Respond to the climate change emergency by ensuring the policies in MNP2 support the UK's climate change commitment to reach net-zero greenhouse gas emissions by 2050;**
- **Manage the impact of development on infrastructure, services and the environment to help maintain the viability of the village;**
- **Maintain the character of the village.**

Mattishall Parish Council considers that good planning requires that green infrastructure be considered in terms of value and the benefits it brings to a local community and its local environment.

#### **2. Local Green Space Review**

As part of the preparation of the review of the Mattishall Neighbourhood Plan the Parish Council has considered its policy approach which applies to the provision of new, and protection of existing, green spaces of various types.

The Parish Council is mindful of the current review of the Breckland District Council Local Plan. Breckland District Council is committed to ensuring that there is a wide range of high-quality open spaces across the District. As part of its “Call for Sites” process in 2022 the District Council, through an open invitation process, sought proposals for sites to be designated as Local Green Spaces. Mattishall Parish Council undertook an assessment of sites within the parish using the criteria set out in the NPPF.

Sites were identified and formally submitted to Breckland District Council for consideration as Local Green Spaces. In the case of each site a clear justification was submitted as to how each site met the required criteria:

1. Reasonably close proximity to the community it serves

2. Demonstrably special to a local community

The land must fulfil one or more of the following criteria:

*(a) Beauty*

*(b) Historic significance*

*(c) Recreational value*

*(d) Tranquillity*

*(e) Richness of wildlife.*

3. Local in character, not an extensive tract of land

4. Land already designated

The result is a comprehensive assessment (see table below for each site) of land that meets criteria set out in the NPPF and has been demonstrated by providing a clear rationale and robust and proportionate evidence.

The Parish Council has liaised with the local planning authority throughout the plan making process and has been wholly consistent in the identification of sites as part of both the Local Plan and Neighbourhood Plan making process.

The sites identified for designation are those which are demonstrably special to the local community where it can be shown to have a particular significance.

### **3. Consultation**

The Neighbourhood Plan review's starting point was to consult with our local community. Central to this was to consult on the proposal to designate sites consistent with the approach taken at the Breckland Council Local Plan Call for Local Green Spaces process.

The well attended community consultation event and associated survey questionnaire in April 2023 gave overwhelming support for the continued designation of the school playing fields and the addition of a further eight sites. The consultation event elicited further evidence of how each site firmly met the NPPF designation criteria. Additional assessment evidence was subsequently obtained from survey work undertaken by knowledgeable local residents and a Parish Councillor using Wildlife Trust trained techniques.

In advance of the Regulation 14 consultation the landowners (where known) were written to, advising that the Parish Council was considering whether a site in their ownership could be suitable for designation as a Local Green Space (Letter 1 attached July 2023).

The Parish Council agreed at its public meeting on 6<sup>th</sup> November 2023 to include the nine identified sites as proposed Local Green Spaces within the reviewed Neighbourhood Plan. As part of the Regulation 14 consultation each of the presumed affected landowners will be formally written to and asked to comment on the proposed designation.

Site name and reference	Assessment against NPPF 2023 criteria			Notes on landowner engagement and conclusion
	Is it in reasonably close proximity to the community it serves?	Is it demonstrably special to a local community and does it hold a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife?	Is it local in character and not an extensive tract of land?	
<p><b>Name:</b> Dereham Road/Howes Lane</p> <p><b>Location:</b> Site 1 on Map 7 in MNP2 Regulation 14, Nov 2023</p> <p><b>Description:</b> Important view and vista- field, north of Dereham Road approaching Mattishall from the west. Currently agricultural land.</p> <p>Site area: 1.522 ha</p> <p><b>Landowner:</b> Unconfirmed but believed to be [redacted]</p>	<p>Yes, the site is immediately adjacent to Mattishall village and its local community. It is located a short walking distance from all village amenities.</p>	<p>The site provides a pleasant view of a rural scene of agricultural land and woodland North of Dereham Road. During the adopted Neighbourhood Plan preparation process 92% of residents stated that maintaining rural views and vistas as wildlife corridors was important. In summary, the site is valued due to its:</p> <ul style="list-style-type: none"> <li>• Beauty</li> <li>• Tranquillity</li> <li>• Richness of its wildlife</li> </ul> <p>As part of a community-wide engagement event in April 2023, residents were asked about the value attached to this site. Eighty-six residents participated and the results are included in the information below.</p> <p><b>Beauty:</b> 77% of community respondents stated that the “Beauty” of this site was important to them.</p> <p><b>Tranquillity:</b> At the 2023 drop in event, 72% of community respondents stated that the “Tranquillity” of this site was important to them.</p> <p><b>Richness in wildlife:</b> Seasonal nesting birds, Muntjac and Roe Deer, Hedgehogs and watervole have all been observed.</p>	<p>Yes, the site is under 20 ha. It is local in character, being located within the village of Mattishall. Its edges are clearly defined by hedgerows/fences</p>	<p>NP steering group sent letter to believed landowners in July 2023. Landowner also included as part of Regulation 14 consultation.</p> <p>Proposed for LGS designation in MNP2 Regulation 14, November 2023.</p>

Site name and reference	Assessment against NPPF 2023 criteria			Notes on landowner engagement and conclusion
	Is it in reasonably close proximity to the community it serves?
